

Vaibhav Magoo MBA, MSc, PMP, CFA Level 1

magoo.vaibhav@gmail.com | 279-234-0386 | California, USA

PROFILE

MBA graduate in Information Systems, PMP-certified, with an MSc in Finance and CFA Level I certification, bringing deep knowledge of financial markets, banking products, and analytical frameworks. Experienced designing Power BI dashboards, generating market research and monthly performance reports, and serving as a liaison between business and technical teams to translate complex financial data into executive-ready recommendations. Proficient in SQL, Python, Excel, and Power BI with a strong foundation in financial modeling, variance analysis, and competitive assessment. Adept at synthesizing complex information into clear presentations and communicating data-backed findings to senior management.

EDUCATION

Fowler College of Business, San Diego State University, MBA Information Systems | GPA: 3.87 2024 – May 2026 | USA

University of Strathclyde, Glasgow, MSc in Finance | GPA: 3.61 2019 – 2020 | UK

Symbiosis International University, BBA, Financial Management 2014 – 2017 | India

CERTIFICATES

Financial Modeling & Valuation Analyst (FMVA), CFI : 07/2026

Project Management Professional (PMP), PMI Institute: 07/2025

Chartered Financial Analyst (CFA) Level 1, CFA Institute: 01/2023

Financial Modeling, Udemy: 05/2021

SQL Data Analytics and Business Intelligence, Udemy: 01/2021

Financial Markets, Yale University: 01/2019

PROFESSIONAL EXPERIENCE

Fowler College of Business - Research Assistant, Financial & Data Analytics 09/2024 – Present | San Diego, USA

- Deployed Claude and GitHub Copilot as primary development tools to build production-ready MySQL pipelines, Python ETL scripts, and web-based reporting interfaces, reducing report revision cycles by 30%.
- Built 10+ financial forecasting and ROI models across 5+ initiatives using Excel and Python, analyzing actuals vs. forecasts and performing variance analysis to identify key performance drivers and inform resource allocation of ~\$1M+.
- Designed Power BI dashboards tracking enrollment trends, grade distributions, and academic performance KPIs; consolidated monthly performance reports and authored executive-ready research reports synthesizing analytical findings for faculty leadership.

Admantium Advisory Group - Financial Business Analyst 03/2021 – 03/2024 | Delhi, India

- Conducted discovery sessions and as-is analysis to map a 14-step manual reporting process across a MySQL-backed client onboarding portal; facilitated JAD sessions with 10+ stakeholders using MoSCoW prioritization, translating outcomes into BRDs, FSDs, and Visio process flow diagrams, securing full leadership sign-off.
- Engineered ETL pipelines using MySQL CTEs and multi-table joins; automated finance reporting via Python and openpyxl, and deployed a live Power BI dashboard, replacing 14 manual steps with a single scheduled pipeline delivering real-time visibility to senior leadership.
- Built financial performance reports tracking revenue pipeline health, client conversion rates, and processing cost metrics across onboarding stages; performed variance analysis comparing actuals against targets, surfacing bottlenecks that informed resource allocation and operational prioritization decisions for finance leadership.

Mphasis UK Limited - Business Analyst, Strategy & Finance 09/2019 – 06/2020 | United Kingdom

- Mapped current-state financial workflows using MOST analysis and Visio to surface bottlenecks across a client-facing banking platform; translated findings into BRDs and FSDs that directly shaped scope definition and system design across a matrixed global organization.
- Executed SQL queries across relational schemas to validate source-to-target financial data integrity ahead of SIT; triaged defects in JIRA and performed root cause analysis on data reconciliation failures, achieving a clean go-live with zero outstanding data errors.

Sun Pharma - Financial Analyst Intern 02/2018 – 09/2018 | Delhi, India

- Conducted operational and financial data analysis across business functions; compiled findings into structured executive presentations delivered to cross-functional leadership, supporting data-backed operational improvement decisions.

SKILLS

Programming & Data: Python, R, SQL (MySQL, CTEs), ETL, NLP, TF-IDF, Machine Learning (SVM, Neural Networks), TypeScript, Next.js.

Finance: Financial Modeling, FP&A, Valuation (DCF, CAPM, DDM, FCFF, FCFE), Forecasting, Budgeting, Variance & Revenue Analysis.

BI & Visualization: Power BI, Tableau, Streamlit, Semantic Data Modeling, KPI Reporting, Snowflake, Lucidchart, JIRA, Visio.

Tools & Platforms: Excel, Confluence, Google Colab, Bloomberg, openpyxl, Claude, GitHub Copilot, Oracle PBCS, Anaplan.

PROJECTS

Transportation Data Analysis | Vehicle Trends & Emission Impact Study:

Analyzed vehicle population data across 13 regions using Python, uncovering a 9:1 private-to-commercial ratio and growth disparities exceeding 400%; translated findings into EV adoption and green infrastructure recommendations.

Financial Modeling & Equity Valuation:

Built multi-asset financial models using CAPM, DDM, FCFF, and FCFE valuation frameworks across 20 index-listed stocks; executed OLS regression, beta estimation, and t-statistic computation via Excel VBA over 5 years of daily price data, translating quantitative outputs into risk-adjusted portfolio recommendations for a risk-averse client.
